REVOLVING SAFETY WOOD and IRON SHUTTERS.—GROXELL, Patentee, 98, Regent-street, and at his Steam-works, 133, Old-street. These shutters have fully borne out their superiority over other revolving shutters for security, durability, and simplicity. Testimonies can be given to hundreds where numbers are fitted herewith, and numerous large establishments, where some are fitted measuring upwards of 400 square feet in one shutter, and which are opened and closed in a few moments with the greatest possible ease, without the use of machinery. The Patentee manufactures Brass Sash Bars, Stall Board Plates, &c.

Revolving Iron Shutters, under Lowrie's Patent, in 100 per foot.

MESSRS. C. AND CO. DID NOT EXHIBIT AT THE GREAT EXHIBITION.

PRIZE MEDAL IRON SHUTTER.
BUNNETT AND CO., ENGINEERS,
ORIGINAL PATENTEES OF REVOLVING IRON SHUTTERS,
Respectfully recommend their
NEW PATENT CURVILINEAR REVOLVING IRON SHUTTER,
For which the PRIZE MEDAL of the GREAT EXHIBITION has been awarded.

This shutter is far superior in STRENGTH, DURABILITY, and APPEARANCE to the CONVEX or any other Revolving Iron shutter. The adoption of the terms of Bennett and Co's advertisements, and the imitation of their various works, without regard to quality, has given rise to many complaints, and tended in some degree to bring such works into disrepute; many persons not being aware that there are other makers.

Bunnett and Co. have therefore made such improvements and additions to their extensive plant of machinery as will enable them successfully to compete with the lowest prices of other makers, without impairing the well-known quality of their own works, and they earnestly solicit a comparison of their New Patent Revolving Iron Shutter with any others, which will at once prove them to be the best and very much the cheapest in the end, and a saving of great and constant annoyance by their not getting out of order.

MANAGING DIRECTOR.—A. C. Hobbs, Esq.
ACCOUNTANT.—Robert Green, Esq.
BANKERS.—Messrs. Heywood, Mansfields, and Co., 4, Lombard-street.
SOLICITOR.—Richard Cattarns, Esq., 33, Mark-lane.
SECRETARY.—Frederick Fortescue, Esq.

The above Company has been formed for the purpose of more effectually bringing into public use the lock lately brought to England by Mr. Hobbs, and patented here, and which has obtained such great celebrity during the extensions of the Great Exhibition, and the excellence proved by the fact of the Prize Medal, with several approbations, independently of five gold medals from different Scientific Institutions in the United States and the Continent of Europe having been awarded to the inventor.

It is proposed by means of this Company to purchase the two patents for a certain sum, one half to be paid in four equal instalments, and the remaining half from the profits of the business, subject to an arrangement with Mr. Hobbs, and to secure his services as Managing Director, by which means, within a short time after the formation of the Company (without any outlay for buildings or machinery), the locks can be manufactured at Wolverhampton or elsewhere, which can be sold at prices varying from an amount as low as 6s., and upwards even as high as 20l., all of them perfectly secure against being picked, and which at a very moderate estimate of the number likely to be sold at the rate of profit actually realized by their sale in America, will yield results such as most amply to remunerate all who may embark in the Company.

Applications to be made for shares to Lewis H. Hazlewood, Esq., 18, Angel-court, Throgmorton-street, or to Richard Cattarns, Esq., 33, Mark-lane, Solicitor to the Company, of whom prospectuses and every information may be obtained.

TESTIMONIAL
from Charles Barry, Esq.:—
32, Great George-street, Westminster, London, Oct. 27, 1858.

Mr. Nathan Gough.

Sir,—I have, for Mr Barry, the pleasure of replying to your request of the 6th inst., for a testimonial of the working of three steam-engines you have supplied for the New Houses of Parliament at Westminster, by saying that they have fully answered the purposes for which they were required, viz., hoisting the building materials; and two of the three have been at work for some years, with very little repair, and with considerable economy of fuel.—I am, Sir, your obedient servant,

Per pro. CHARLES BARRY,
ALFRED MEE SON.
